Claims 1-3 are presented for examination.

The remarks filed on February 12, 2007 have been received and entered.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB Patent 1499485. The GB Patent teaches the claimed compound as a species of a

Art Unit: 1618

genus having diuretic and saluretic effect. See page 1, column 2 and page 2 column 1. It would have been obvious to a person skilled in the art to use the claimed compound in a pharmaceutical formulation, motivated by the teaching that the genus encompassing the claimed compound has been previously used in pharmaceutical composition. Applicant has presented no evidence to establish the unexpected or unobvious nature of the claimed invention, and as such, claims 1-3 are properly rejected under 35 U.S.C. 103.

Applicant's arguments and remarks regarding the rejection of December 1, 2006 have been carefully considered and found to be persuasive. Therefore, the rejection of December 1, 2006 is hereby withdrawn.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zohreh A. Fay whose telephone number is (571) 272-0573. The examiner can normally be reached on Monday to Friday 9:30-6:00.
